The STORServer Appliances were designed to provide simple, complete end to end Backup, Recovery, Archive and Disaster Recovery from a single solution for all of your critical data and applications. STORServer appliances can be configured to meet any Recovery Time Objective or Recovery Point Objective your organization may have regardless of size, operating system, application or location.

STORServer Backup Appliances are the only "Best Practices Recommendation" from IBM for Disk to Disk to Tape data protection and recovery. All STORServer appliances are fully configured and tested prior to shipment and are up and running on your network within 30-minutes of unpacking. The Average STORServer implementation is an industry leading 3-business days.

STORServer Backup and E-mail appliance solutions have been configured and installed into cities, counties and local government agencies around the United States and Internationally since 1995 and MGBS Inc. can easily provide a list of client references for your organization to contact if requested.

Any STORServer Backup or E-mail Archive appliance that is ordered between 1/1/09 and 6/30/09 will receive FREE shipping simply by noting the MGBS Inc. Current Promotion page & Web-site.
